

Unit of Study Survey

2024 Semester 1 Results Summary

Prepared by the Insights Team, Advanced Analytics and Planning, and Enterprise Data (AAP).

EXECUTIVE SUMMARY

1. The University recorded an overall (Q1-6 mean) score of 4.24 in Semester 1 2024, falling from 4.25 in Semester 2 2023 (**Figure 1, Table 6**). After 9 consecutive semesters of either improved or steady results, overall (Q1-6 mean) scores peaked in Semester 2 2022 and have stabilised for the subsequent 3 semesters. Despite the decrease, every faculty recorded an overall (Q1-6 mean) score of 4.00 or higher for the ninth consecutive semester (**Figure 2**).
2. Q7 ("Online Learning Environment") and Q8 ("Learning Community") were introduced in Semester 1 2020 to capture online learning experiences during the COVID pandemic. Q7 ("Online Learning Environment") was discontinued in Semester 1 2022 due to students returning to face-to-face teaching in 2021. Q9 ("Learning Engagement") was introduced in Semester 1 2022 to gather feedback on student classroom learning experiences.
3. Q8 ("Learning Community") achieved a mean score of 4.13 in Semester 1 2024, an improvement from 4.11 in Semester 1 2023. Q9 ("Learning Engagement") achieved a mean score of 4.21 in Semester 1 2024, this was also an improvement from 4.18 in Semester 1 2023 (**Table 8**).
4. Compared to Semester 1 2023, Semester 1 2024 results saw an improvement in all six core questions except Q5 ("Challenging Assessments") (**Table 6 – Table 7**). All six core questions achieved an overall (Q1-6 mean) score above 4.00 for the eighth consecutive semester. Q1 ("Teaching Quality") received the highest overall (Q1-6 mean) score at 4.30 followed by Q2 ("Intellectually Rewarding") and Q5 ("Challenging Assessment") that both scored 4.26.
5. At Faculty level, the faculties of Engineering and Medicine and Health recorded slight decreases in overall (Q1-6 mean) scores (**Table 6 – Table 7**). All other faculties recorded improvements in overall (Q1-6 mean) scores in Semester 1 2024 compared with Semester 1 2023. The University-wide faculty recorded a significant improvement in overall (Q1-6 mean) scores, increasing from 4.02 in Semester 1 2023 to 4.16 in Semester 1 2024. This increase was visible across most core questions and especially in the international cohort where all six core questions recorded significant improvements (**Table 14 – Table 15**).
6. For USS overall (Q1-6 mean) scores, international students continued to rate their USS experiences more favourably than their domestic peers (4.36 vs. 4.08) for the 19th consecutive semester. For the international cohort, overall (Q1-6 mean) scores improved slightly from 4.33 in Semester 1 2023 to 4.36 in Semester 1 2024. This result was visible across all six core questions and faculties except the Conservatorium of Music and the faculties of Law and University-wide. These faculties all recorded significant increases in Semester 1 2024 after coming off poor results in Semester 1 2023. For the domestic cohort, overall (Q1-6 mean) scores decreased from 4.10 in Semester 1 2023 to 4.08 in Semester 1 2024, a trend that was visible across all six core questions (**Table 12 - 15**).

7. For Q8 ("Learning Community") international students rated their USS experience more favourably than their domestic peers for the ninth consecutive semester (4.28 vs 3.93). Like the six core questions, international cohort scores for Q8 improved slightly from 4.25 in Semester 1 2023 to 4.28 in Semester 1 2024. The domestic cohort scores for Q8 decreased slightly from 3.94 in Semester 1 2023 to 3.93. For Q9 ("Learning Engagement") the international cohort also rated their USS experience significantly more favourably than their domestic peers in Semester 1 2023 (4.36 vs 4.02) (**Table 16**).
8. Responses on Experiential learning (EL) versions of the USS were fully implemented for the first time in Semester 1 2019. Entrepreneurship Project, Industry or Community Project, and Research Project (EL) Units saw a significant improvement in the results of both EL items and core questions (Q1 – Q6) since Semester 1, 2023 (**Table 17 - 20**). Placement or Internship (EL) units saw or decreased mean scores in both EL items and core questions (Q1 – Q6) compared to last year.
9. UG Unit of Study scores remained steady at 4.18 in Semester 1 2024. However, PGCW Unit of Study scores improved from 4.30 in Semester 1 2023 to 4.34 in Semester 1 2024 (**Table 21**). This was especially visible in the Conservatorium of Music and the Faculty of Law. Given that the UG scores for these two faculties remained relatively steady, the increases in PGCW scores would have had the greatest influence on the overall (Q1-6 mean) scores for those faculties visible in Semester 1 2024. The results also suggest that UG Units of Study would have caused the decrease in overall (Q1-6 mean) scores for the Faculty of Engineering, and that PGCW Units of Study would have caused the decrease in overall (Q1-6 mean) scores for the Faculty of Medicine and Health in Semester 1 2024.
10. Student satisfaction in 1000-level units was significantly lower than for the entire University. In Semester 1 2024 overall (Q1-6 mean) satisfaction was 4.15 for 1000-level Units compared to 4.24 for the entire University. This trend was visible across all core USS questions (Q1 – Q9) and faculties (**Table 9 – Table 11**). Of the core USS questions, Q6 ("Helpful feedback") recorded the lowest satisfaction among the 1000-level units, a trend that has been visible since 2019 (**Figure 3**).
11. Student response rates increased from 29% in Semester 2 2023 to 33% in Semester 1 2024 (**Table 1**). This was the highest response rate since Semester 1 2019.
12. The percentage of USS Surveys with below-par response rates decreased from 53% in Semester 2 2023 to 49% in Semester 1 2024 (**Table 2**). This was the lowest percentage since Semester 1 2019.
13. Student response rates for 1000-level Units were on par with response rates for the entire University in Semester 1 2024 (**Table 4**).
14. The percentage of USS Surveys with below-par response rates for 1000-level Units was 9pp lower than for the entire University in Semester 1 2024 (**Table 5**). This is a trend that has been present since 2022.
15. Staff participation in Closing the Loop (CTL) increased from 28% in Semester 1 2023 to 30% in Semester 1 2024 (**Table 3**).

Appendix 1. About Unit of Study Survey (USS)

The Unit of Study Survey (USS) collects feedback on the student experience at the unit of study level. It was introduced in Semester 1 2015 to replace the Unit of Study Evaluation (USE). The USS is administered online by the Advanced Analytics and Planning, and Enterprise Data Group using Sydney Student data to generate the list of units of study to be surveyed each session (i.e. semesters, intensives, winter and summer schools). All units of study are automatically surveyed each session, and all enrolled students are invited to participate. There are six quantitative items and two open response items on the USS that are common University-wide. In Semester 1, 2020 two additional quantitative questions were added to capture the online learning experience under the COVID19 pandemic. In Semester 1 2022 Q7 was discontinued and Q9 was added to capture the face-to-face learning experience after students began returning to learning on campus. The main results in this report are based on the core six quantitative items, with Q8 and Q9 results reported separately. The questions are:

In this unit of study:

1. *Overall I was satisfied with the quality of teaching by the teacher(s).*
2. *The work has been intellectually rewarding.*
3. *I developed relevant critical and analytical thinking skills.*
4. *I have had good access to valuable learning resources.*
5. *The assessment tasks challenged me to learn.*
6. *I have been guided by helpful feedback on my learning.*
7. *I have felt supported to learn in the online environment. **
8. *I felt part of a learning community. **
9. *I have been actively engaged in learning during class. ***

Response scale: 1 = Strongly Disagree, 2 = Disagree, 3 = Neutral, 4 = Agree, 5 = Strongly Agree

(* New items added in Semester 1, 2020 to gather feedback from across the University on the student experience of online learning. Question 7 was removed in Semester 1, 2022 as a result of students returning to face-to-face teaching)

(** New item added in Semester 1, 2022 to gather feedback on the student classroom learning experience after returning to face-to-face teaching)

Open response items:

- *What have been the best aspects of this unit of study? ...*
- *What aspects of this unit of study most need improvement? ...*

Surveys with less than 5 responses or less than 20% response rate are excluded from formal reports and Education KPI calculations. However all survey results are available via the Student Survey System: <https://student-surveys.sydney.edu.au/staff/results/uss/>.

Appendix 2. University-wide Experiential Learning versions

These EL versions of USS are applied automatically to units of study with 50% or more of their assessment related to one of seven experiential learning categories. Each version includes the University's common items, and four quantitative items. See the list below for additional quantitative items in each EL version.

ussEL-EP (Entrepreneurship Project)

- I improved my ability to develop innovative ideas.
- I developed my ability to work effectively with others studying in a different field(s) from me.
- I developed my capacity to respond constructively to challenge.
- I developed my capacity to exercise leadership and influence when required.

ussEL-ICP (Industry or Community Project)

- I have developed my ability to respond creatively to novel problems.
- I developed my ability to work effectively with others studying in a different field(s) from me.
- I developed my capacity to respond constructively to challenge.
- I developed my capacity to exercise leadership and influence when required.

ussEL-MOB (Standard Mobility (without Fieldwork, Project or Placement Components))

- Overall I was satisfied with the quality of this mobility experience.
- I developed my spoken communication skills.
- I developed my ability to work effectively with people from cultures other than my own.
- I developed my capacity to respond constructively to challenge.

ussEL-MOBEXP (Mobility With Fieldwork, Project or Placement Component)

- Overall I was satisfied with the quality of this mobility experience.
- I developed my spoken communication skills.
- I developed my ability to work effectively with people from cultures other than my own.
- I developed my capacity to respond constructively to challenge.

ussEL-PF (Consequential Practical or Fieldwork)

- I developed the ability to practically apply knowledge of the field(s) I am studying.
- I developed my ability to think independently about problems.
- I developed my ability to work effectively with digital and online tools and information.
- I developed my capacity to respond constructively to challenge.

ussEL-PI (Placement or Internship)

- I developed the ability to practically apply skills from the field(s) I am studying
- I developed my ability to work effectively with others.
- I developed my capacity to contribute positively to a community or organisation.
- I developed my communication skills.

ussEL-RP (Research Project)

- I developed my ability to think independently about problems.
- I developed my written communication skills.
- I developed my capacity to respond constructively to challenge.
- I developed the ability to apply ethical reasoning to decision-making.

1. **Research Project:** [A key feature of this type of unit would be acquiring and applying methods of research.] This category includes all units undertaken that comprise a substantial research project, where the total weighting of research-related tasks e.g. literature review, learning relevant methodology and methods, theoretical or empirical investigation, data analysis, reporting findings, etc reaches at least 50% of the assessment for the unit. Individual or groups of students address and report on authentic problems, provided by University (faculty or cross-faculty) or external partner researchers. This category also includes Honours research projects, coursework theses or dissertations. NB: It is recognised that students may engage in some international fieldwork for their research, but where this is optional, the unit should be characterised as type (i) rather than type (vii).
2. **Industry/Community Project:** [A key feature of this type of unit would be addressing a problem or issue in a contextualised setting.] This category includes all units undertaken that require individual or groups of students to complete a substantial project worth at least 50% of the assessment for the unit that has been sourced from a community or industry partner, that is not either a research project or an entrepreneurship project. In these projects, students research, analyse, and present solutions to authentic industry- or community-specific problems. Teaching and assessment is primarily the responsibility of University staff, with engagement by the external partner varying by unit of study depending on the agreed arrangement, say from quite minimal involvement (e.g. providing informal feedback on student presentations) to broader involvement.
3. **Entrepreneurship Project:** [A key feature of this type of unit would be understanding or experiencing the process of enterprise creation.] This category includes all units undertaken that require individual or groups of students to engage in a substantial project worth at least 50% of the assessment for the unit relevant to the development or establishment of a commercial or social enterprise.
4. **Placement or Internship:** [A key feature of this type of unit would be using knowledge and skills in a workplace setting.] This category includes all units undertaken that place students within a work setting. This category includes professional placements (requirement of professional degree, e.g. education, health, engineering), and internships (optional work placement e.g. law, arts). The placement or internship should be the primary focus of the unit, where (work associated with) the placement/internship is worth at least 50% of the final mark.
5. **Consequential Practical or Fieldwork:** [A key feature of this type of unit would be using knowledge and skills in an academically structured setting or context.] This category includes all units undertaken that include a substantial practical component in the form of laboratory work (e.g. chemistry, physics, engineering), field work (e.g. agricultural science, archaeology), simulation (e.g. law mock-court, clinical simulations, role plays), studio or design work (e.g. architecture, design, visual arts, engineering), performance or exhibition (e.g. music, visual arts), or preparation for placements or mobility experiences. The practical or fieldwork should be the primary focus of the unit, where (work associated with) the practical/fieldwork is worth at least 50% of the final mark.
6. **Standard Mobility (without project, placement, or fieldwork component):** This category includes units undertaken overseas that would not be classified as any of the types (i) – (v) if undertaken in Australia. Typical mobility experiences include exchange for short-term, semester and year-long study at an overseas institution.
7. **Mobility (with project, placement, or fieldwork component):** This category includes all units that would be classified as any of (i) – (v) if conducted in Australia but that are primarily undertaken overseas by all enrolled students. This category includes international projects, international placements, and international fieldwork.
